

Case Study - Petrofac Generator Service & Support

| | |
|------------------------------|--------------------------------------|
| CLIENT: | Petrofac |
| PROJECT: | Laggan Tormore Gas Plant |
| OWNER: | Total |
| PRINCIPLE CONTRACTOR: | Petrofac |
| LOCATION: | Laggan Tormore Gas Plant |
| PLANT: | 550kVA portable generation equipment |
| DURATION: | January 2013 on-going |
| VALUE: | £500,000 on-going |

Project Highlights:

- The generation plant and supporting equipment was sourced and delivered to site 7 days in advance
- Prontoport works in partnership with client to minimize the logistics of supporting a geographically remote site.
- All equipment were checked in warehouse prior to delivery
- Environmental impacts were reduced to minimum through cooperation between QSHE department and client.

Contract Description:

Prontoport was head-hunted in December 2012 by Petrofac to supply flexible electrical generation solution for the new development. Using existing supply chain agreements Prontoport was able to source and supply three generator sets and associated fuel storage and refuelling equipment during Christmas period for the project.

Key Skillsets:

- Supplier management during Christmas Period
- Asset management and integration to existing construction environment.
- Manufacturer approved electrical and mechanical servicing in 24 hours
- Logistics and QHSE compliance to 24/7 construction activities.
